CUSTOM EQUIPMENT SOLUTIONS Recycling Equipment

Ameri-Shred offers custom solutions for recycling applications and will take your specific requirements into account whether they pertain to space, particle size, electrical limitations or throughput.

Custom Equipment Examples:

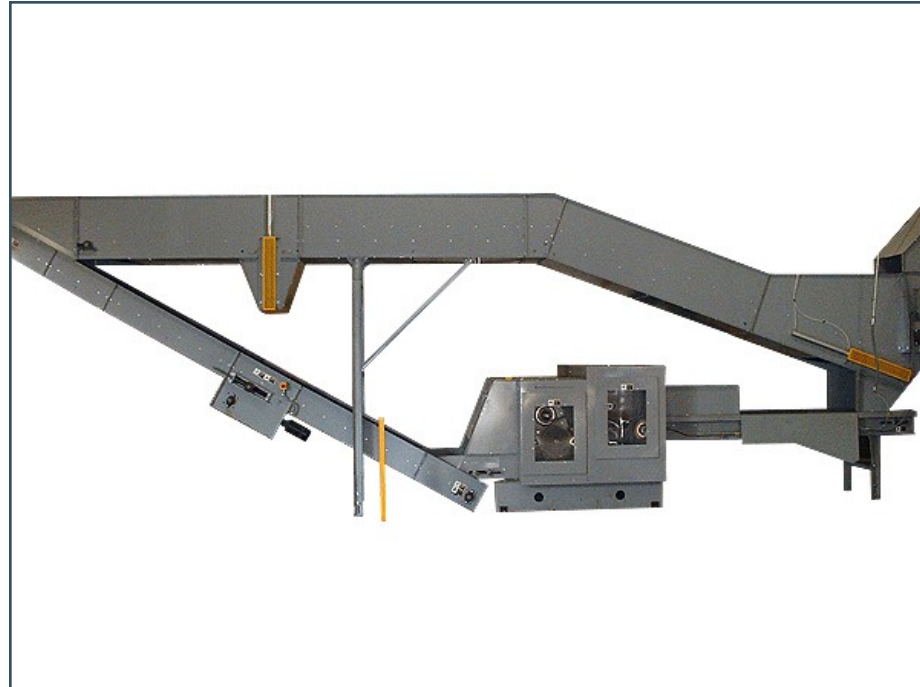

- Cart tippers with an extra high discharge height for hopper fed applications
- Cart tippers with double door enclosures
- Shred truck unloading conveyors that bypass the shredder and directly feed the baler
- Critical transfer conveyors that tie unrelated equipment together

The AMS-Bypass conveyor is one of our most widely used custom solutions and is shown above with a Series 4 industrial paper shredder.

It was designed to transfer shredded documents from a mobile shredding truck directly to a baler, thereby eliminating the need to run previously shredded material through a shredder a second time, unless desired.

The unique retractable pulley allows the operator to either feed the shredder or send the material directly to the baler.
